Patterns for the Dangles are:

You can add the Pearl First or last, however I find it is easier to add the Pearl Dangle to the Chandelier earring finding first.

Dangle pattern:

Top Center Pearl - 1 6mm Pearl only

1 & 7: 1 Gold, 1 Orange, 1 Gold

2 & 6: 1 Gold, 2 Orange, 1 Gold

3 & 5: 1 Gold, 3 Orange, 1 Gold

4: 1 Gold, 4 Orange, 1 Gold

Prepare your supplies:

1) If needed, straighten the Eye Pins using the Flat Nose Pliers with Painters Tape or a pair of Nylon Jaw Pliers.

Hold the eye-pin with a pair of pliers, run the nylon jaw pliers down the length of the eye-pin several times until straight. You will Repeat this for all 16 eye-pins.

2) Add beads to the Eye Pins, see Dangle pattern above.

3) **MAKING THE LOOPS**; practice, practice, and more practice.

First practice so you can master the art of making wire loops.

Once you get this mastered, the rest are easier and you can use wire loops to make other projects too!

Pliers and Diagonal Cutter:

Using the Round Nose Pliers, bend the wire 45 degrees, just above the top bead.

Cut the wire to leave a 1/4" of wire for the loop.

NOTE: I prefer that both loops be parallel with each other, and that the wire forms an 'S' Shape.

Using the Round Nose Pliers; curl the wire around to complete the loop.

Position the end of the wire very close to the top bead.

Repeat to complete the remaining Dangles.

***Another OPTION could be to use the 1-Step Looper (tool):**

See Youtube Video Tutorial and/or follow instructions on the 1 Step Looper package.

4) Putting it all together:

Using the Round nose Pliers and the Long Nose Pliers;
Add the Pearl to the top center of the Chandelier Finding.

Add each dangle to the 7 loops of the Chandelier Finding.
Be sure to close the loops securely.

Add the Ear wire.

5) Repeat steps for the 2nd earring.

You're DONE!!!
