Drum Earrings

Peyote/Brick Stitch
ERP-298

*Bead count listed after color description.
190 beads equal approximately 1 gram*

Colors listed for both a Christmas Drum or Band Drum.

Cut and wax a section of white, size "O" or "B" Nymo® thread approximately 1-1/2 yards for each earring.

Begin pattern at the Base Row * marked at the bottom of the pattern. Start by placing the first two beads of Base Row approximately 1/2 of the way in on the thread. This will allow enough thread for each half of the pattern.

Completed the Base Row(21 beads). Run the needle through the last two beads of Base Row (DB 221) to reinforce. If the earrings are supposed to face opposite directions, this is the time to check for this. Pick up (1) Crystal or any trim bead that goes with the colors used in the design, (4) DB 221 beads that make up the loop for the ear wire along with the ear wire. Run the needle down through the trim bead and through the opposite side of DB 221. Repeat to reinforce.

Complete first half of the pattern. Attach needle to other end of thread and complete other half of the pattern. Weave in thread, tie off and cut.

Band Drum Suggested Colors

- DB 45 Silver Lined Orange (204)
- DB 144 Silver Lined Amber(138)
- DB 149 Silver Lined Dark Aqua(62)
